

# Finding and applying for funding in academia

## Description and objectives

The objectives of this workshop are:

- Receive information about funding organizations and suitable funding possibilities especially for women researchers (Switzerland and EU) and in respect of the academic level and career planning
- Know the most important features about planning and preparing an application and a research project
- Practical exercises: analysis of the current career situation of each participant and work on the first part of an application. This part will be prepared by the participants a couple of weeks before the course starts and according to trainer's requirements
- Group coaching: participants present and discuss their career concept within the group and receive feedback by the trainer

## Approach

Theory by the trainer combined with individual work, practical exercises, group discussion and feedback. Practical exercises are based on CV and career concept of each participant. The career concept will be prepared by the participants before the workshop and according to trainer's requirements (details will be communicated at the latest two weeks before the workshop).

## Trainer

Susanne Matuschek, MATUSCHEK CONSULTING
