Funding Body

Funding agencies increasingly wish to track published outcomes of funded research and enable access to them. ACM makes it easy to support directives calling for public access to funded research. ACM now requests identification of agency and grant numbers in a normalized form. ACM is using the Open Funder Registry provided by Crossref's Funding Data Service (https://crossref.org/fundingdata/index.html). Please type in the acronym or name of the funding agency and click on the standard naming convention of your funding agency. Please add award number(s) separated by commas. Once you have completed entering the information, click "Add Funding Body" and repeat (if necessary).

Selecting a Creative Commons license option means your choice of license will be displayed on the published version of your paper in the ACM Digital Library. However, the Creative Commons license you choose will only be added to your paper after the ACM Open Access Charges are paid.

CC-BY is the default CC license and is required by RCUK to qualify for their funding.

CC0 waives all the owner's rights under copyright and database protection law. It is especially useful for releasing data sets and databases to the public for any and all purposes. **This does not include your use of third-party data sets.**
