

Committed and with passion for precision we create digital reality solutions combining sensor, software, and autonomous technologies to empower a sustainable future.

As a team player, your vigor is contagious, and you engage your colleagues. No matter the task, you go ahead with an open mind. If loyalty as well as solidarity and reliability are a matter of course for you, join our team and make your visions come true!

Internship Product Engineer (f/m/d)

Heerbrugg  100%

This appeals to you

- Be part of multicultural and agile product management team driving innovation for the world's largest GNSS correction service (HxGN SmartNet)
- Understand customer needs and translate them to product specifications
- Contribute to new service innovations
- Test software to ensure our solutions achieve Leica Geosystems' high quality standards
- You enjoy working with software and new technology
- Support the development for product improvements

This is you

- You study/studied Geodesy, Surveying, Geomatics or a similar discipline
- You are available for minimum 6 months
- You have an interest in GNSS software and/or IT
- You are solution oriented and enjoy problem solving
- You like to work in collaborative teams, yet are able to work independently
- You enjoy being creative and bringing in own ideas
- Fluent in English, written and spoken, German would be a plus

About Us

Hexagon is a leading provider of digital reality solutions and employs more than 21,000 people in 50 countries. You will be part of a strong, experienced, inspiring and motivated team of experts driving the future of Hexagon. You will use and develop your skills in our highly innovative and diverse environment.

Flexible working models allow you to ideally combine work and private interests.
