

# Lyfegen

## Student in Health Data & Software Management

Help patients to receive the healthcare they need.

Lyfegen is a healthcare technology company that has developed a ground-breaking software platform to improve the life of every patient by increasing access to the best healthcare treatments available. Our mission is to create the most disruptive HealthTech company by driving the world's transition to value and data-driven healthcare.

We are looking for a motivated and entrepreneurial **Student in health data & software management**. Your responsibility is to ensure quality, completeness, and integrity of the data relevant to our software product. We are a fast-growing software company and are doing things nobody has done before! Thus, creative problem solving is a must and a get-things-done mentality a definitive requirement.

### Your main responsibilities

- Work together with the Product Owner to deliver meaningful content for our customers
- Search for health data information
- Transform information and manage our software product
- Maintain our software product

### Who you are

- Curious to learn about pharma pricing and health economics
- Self-guided and driven
- Detail-oriented and proactive
- Excellent written and verbal communication skills in English
- Previous experience in health economics, healthcare, medicine, or data research is a plus

### What we offer

- Join a focused vision to help patients receive the healthcare treatments they need
- Direct influence on the growth and success of Lyfegen
- The possibility to work flexibly
- Become part of a team of international high performers
