

TITLE : Software Development Internship

DEPARTMENT : Digital Transformation

REPORTS TO : Head of Innovation and R&D

---

## **JOB PURPOSE**

In the realm of digital transformation, the objective lies in developing resilient and maintainable digital solutions.

We seek a driven intern to aid us for six months in different software development projects. These projects cover areas from connectivity protocols to cloud applications within a microservice architecture.

The internship will offer a prime opportunity to gain practical experience in coding high quality, modern software solutions with exposure to DevOps tools and Microsoft technical stack.

## **JOB RESPONSABILITIES / ROLES**

- Supporting the development team in daily tasks.
- Contribute to all activities carried out along the iterations of an agile software development process:
  - Planning & Verification
  - Implementation
  - Code Quality & Testing

## **REQUIREMENTS / QUALIFICATIONS**

- Good programming background in C#
- Good communication skills and openness to feedback.
- High motivation to learn new tools and technologies.
- Ability to work in a team environment, with a willingness to contribute to projects and learn collaboratively.
- Strong analytical competencies
- Very good English language skills
- Student or graduate of a bachelor's or master's degree program
- In possession of a valid residence permit in Switzerland
