Ref. IT_internship_Dec2022

Paid internship

Place of work: Geneva, Switzerland (part-time remote work possible)
Language: French and English
Contract: Paid Internship, 6 to 12 months (tripartite agreement mandatory)
Workload: 60-100%
Entry in service: From now

Join a fast-growing Geneva-based Edtech startup in full growth phase!

Beekee is solving one of the world's trickiest problems – how to bring quality education to everyone, everywhere.

Not everyone has access to reliable internet or a nice classroom, but almost everyone in the world now has a smartphone. With our Beekee Box, digital classrooms with bespoke preloaded content move around with instructors, without the need for internet or power. Students get live content, interactive tools, and assignment materials directly from the Beekee Box unto their smartphones, ensuring consistent quality and learning success.

Beekee is based in Geneva and practices a mixed remote / presence workspace.

What we are looking for

The Beekee team is looking for an IT intern to help us operate and improve our IT systems, provide support to our clients, and manufacture our devices, the Beekee Boxes and Beekee Hubs.
A tripartite agreement with an educational institution is mandatory.

The impact you can have

You will help us to deliver and maintain our solutions that will have a significant impact on the people who benefit from them. We are a small, dynamic team; you will have responsibilities.

Your mission

- Help operating Beekee IT systems:
  - Cloud servers
  - Beekee Boxes/Hubs (configuration, maintenance and IOT fleet management)
  - Moodle LMS (configuration, maintenance)
- Research, diagnose, troubleshoot, and identify solutions to resolve incidents
- Provide assistance to our clients, troubleshoot their issues

- Document technical knowledge in the form of Knowledge Base Articles
- Take initiative to improve company infrastructure platforms toward operational excellence
- Manufacture Beekee Boxes and Hubs (3D printing, Raspberry Pi, configuration)

Required skills

- Good knowledge of systems, networking software, and networking protocols.
- Good knowledge of Linux
- Rigor and autonomy in the execution of processes
- Ability to dive into complex technical problems and develop smart solutions
- French and English verbal and written communication skills
- Knowledge in HTML, JavaScript, PHP, Bash, SQL
