

Young Talent – Quality Hydraulics (m/f/x)

Are you looking forward to starting your professional career in a multinational environment? Join our internship program to launch your career with us and benefit from our hands-on approach. We are looking for candidates available for 12 months internship as of February 2027.

Your responsibilities

- You will support manufacturing and assembly process by conducting fault analysis and implementing corrective measures using methodologies such as 8D, QRQC and SHAININ;
- You will organize and implement Conformity of Production tests to ensure compliance with quality and regulatory requirements;
- You will support Customer Service in the management and resolution of customer claim (0 Km);
- You will contribute to statistical assessments related to complaints, assembly and test bench First Pass Yield;
- You will support the change management process, including Engineering Change Requests and Engineering Change Notices;
- You will actively participate in task forces addressing specific production issues;
- You will assist in the preparation of internal and external audits (ISO9001 / EN9100);
- You will contribute to the preparation of monthly KPI reports and proactively support the continuous improvement of Liebherr Machines Bulle product quality.

Your profile

- You hold a Bachelor's or Master's degree in Mechanical Engineering, Electrical Engineering, Production Engineering, or similar qualifications;
- You have specific training in the field of quality (i.e. 8D, VDA6.3, QRQC, Six-Sigma, SHAININ, EN9100 auditor, MSA etc...);
- You ideally have some professional experience in the field of industrial or automotive manufacturing quality management;
- You are proficient in tools such as QS-STAT (or similar) and CAQ CASQ-it, and you are familiar with CAD.
- You are an effective communicator with strong moderation skills and a structured working method.

- You are consistent and persevering and can organize your work independently while demonstrating a practical, hands-on approach to your work.
- You have a good command of English, German and/or French.

Our offer

You will have the opportunity to immerse yourself in the world of work and gain varied and exciting experience in an international family business. We offer you the opportunity to perform interesting tasks and to have responsibilities as well as to develop your ideas. You will be trained, supported and accompanied by a dynamic team. You will benefit from modern working conditions such as flexible working hours, the possibility to work in a home office, a company restaurant and many other advantages. The workplace is located in Bulle, in the beautiful region of Gruyère. Plan your personal and professional development with us.

In order to guarantee a fair application procedure, we do not accept applications by post or e-mail.

Have we awoken your interest? Then we look forward to receiving your online application. If you have any questions, please contact Léa Grivel.
One Passion. Many Opportunities.

The Company

Liebherr Machines Bulle SA is the centre of excellence for combustion engines (diesel and gas engines) and hydraulic components (axial piston pumps and motors). The company develops and produces various products, which find their use in building construction and civil engineering, mining, agriculture, decentralised energy, machine and plant engineering, as well as aerospace.
