

Technology for the environment

Ecorobotix SA, a Swiss startup from Yverdon-les-Bains, offers innovative solutions using robotics to mitigate the impact of agricultural activities on the environment. We developed high-precision spraying technologies, that substantially reduce chemicals used to treat crops. By joining our dynamic and resourceful team, you can help us make agriculture more sustainable. We are a B Corp certified company.

We are currently looking for a :

Procurement Department Intern

Duration: 3 months to 6 months expected to start as soon as possible.

Your responsibilities:

- Supply electronic, mechanical, and fluidic components for R&D and assembly departments ;
- Analyze markets and come up with alternate suppliers for critical parts ;
- Ensure supplier monitoring (quality and delays) and handle operational claims ;
- Follow the supplier procurement strategy to achieve the best total value ;
- Update our ERP (Odoo) procurement database ;

Our requirements :

- University or Business School degree with a major in procurement, engineering, or management ;
- Knowledge of usual IT tools (Microsoft Office suite, especially Excel), and usual ERP procurement module (Odoo would be ideal) ;
- Mandatory: Fluent in French and English; Good level of Spanish or German would be a plus ;
- Independent, curious, resourceful, eager to learn new skills, and thorough ;
- A previous work or internship experience in the supply chain would be a plus ;

What we offer :

- An engaging internship in an innovative state-of-the-art technology scale-up ;
- An opportunity to take part in a more sustainable, more environmentally respectful agriculture ;
- A place in a motivated and dynamic team in a start-up-like company;

You can apply by sending your resume and cover letter to talents@ecorobotix.com
